

KRUSHNA SUTARIYA

Software Engineer | Full-Stack Development | React, TypeScript, Python

📍 88299 Leutkirch im Allgäu | 📞 +49 172 3053306 | ✉️ krushnasutariya19@gmail.com | 🌐 krushna-sutariya | 🐙 krushnasutariya

ABOUT ME

Software Engineer with completed Master's studies in Software Engineering and hands-on experience building frontend, backend, and full-stack applications using React, TypeScript, JavaScript, Python, FastAPI, REST APIs, and WebSockets. Gained professional software development experience at BMW Group developing data-driven applications and real-time visualization tools in an agile environment. Built and deployed full-stack applications using Docker, CI/CD, cloud services, and modern web technologies. Strong interest in developing reliable, user-focused software and growing across frontend and backend engineering.

TECHNICAL SKILLS

Programming Languages: Python, TypeScript, JavaScript, Java basics

Frontend: React.js, Vite, HTML5, CSS3, Tailwind CSS, Mapbox GL JS, React Leaflet, Chart.js, Turf.js, UI/UX

Backend and APIs: FastAPI, Django fundamentals, REST APIs, WebSockets, Pydantic, SQL Server, DynamoDB

Testing & Engineering: pytest, Git, GitHub, GitLab, Postman, Agile/Scrum

Cloud and DevOps: Docker, Docker Compose, AWS, Google Cloud Run, Terraform, GitHub Actions, GitLab CI/CD, Linux

AI and Machine Learning: Gemini API, LLM applications, Explainable AI, recommender systems, Scikit-learn, Pandas, NumPy

Tools: Figma, Jira, Google Colab, VS Code, Foxglove Studio

PROFESSIONAL EXPERIENCE

BMW Group

Software Development Intern

Feb 2025 – Jul 2025

Munich, Germany

- Redesigned the web-based Localization and Map Visualization platform for BMW's ADAS team using React.js, TypeScript, and Mapbox GL JS, including modular UI components, collapsible sidebars, layer controls, and dynamic map-state handling, resulting in a 40% increase in data analysis speed for test-drive validation teams.
- Built dual-layer geospatial visualizations for lane and road position candidates using Mapbox GL JS and Turf.js, including color-coded paths and timestamp hover popups.
- Developed a Foxglove Studio configuration panel with React.js and TypeScript for live layer visibility control of traffic signs, lane markings, centerlines, and map settings.
- Replaced static analysis outputs with a real-time browser dashboard using Python, WebSockets, Plotly, and Chart.js.
- Implemented 2D and 3D vehicle localization hypothesis visualizations, including WGS84-to-ENU coordinate conversion and probability-scaled cylinders in Foxglove Studio.
- Worked in an agile Scrum team using Git, pull requests, sprint planning, daily stand-ups, and code reviews.

Techsphere Softwares LLP

Front-End Developer

Jan 2021 – Apr 2023

India

- Developed responsive web pages and reusable UI components using HTML, CSS, and JavaScript for client-facing applications.
- Integrated frontend views with backend APIs and supported usability improvements, browser compatibility testing, and clean code maintenance.
- Collaborated with developers and stakeholders to translate requirements into functional web interfaces.

Savaj Infotech

Web Designer

Aug 2016 – Dec 2020

India

- Designed and implemented website layouts, landing pages, and UI components with focus on usability, responsiveness, and visual consistency.
- Created UI concepts and page structures for client projects and collaborated with developers to deliver functional web solutions.

PROJECTS AND RESEARCH

Full-Stack Portfolio & AI Assistant

React.js, Vite, Tailwind CSS, FastAPI, WebSockets, Gemini API, Resend, Docker, GitHub Actions, GitHub Pages, Hug-ging Face Spaces

Jun 2026

- Built and deployed a full-stack personal portfolio with responsive React frontend, project showcase, downloadable CV, contact form, and a WebSocket-based Gemini AI assistant.

- Implemented real-time communication using WebSockets and integrated AI-powered chat functionality using Gemini API and structured project context.
- Developed a FastAPI backend with REST endpoints, Pydantic validation, Resend email notifications, Docker Compose setup, and deployment using GitHub Pages for the frontend and Hugging Face Spaces for the backend. Live demo: krushnasutariya.github.io/krushna-portfolio

SkyMap Weather Application
React.js, Vite, Tailwind CSS, React Leaflet, OpenWeather API, GitHub Pages

Jun 2026

- Built and deployed a responsive weather map application with city search, interactive map selection, live weather data, and custom weather UI components.
- Integrated external APIs and map-based interactions to display weather, forecast details, location-based data, and user-friendly visual feedback. Live demo: krushnasutariya.github.io/sky-map-weather

Master’s Thesis: Explainable LLM-Based Recommendation System
Hochschule Heilbronn, Germany

Nov 2025 – Apr 2026

- Designed explainable recommendation strategies for the IdeaLize academic collaboration platform using textual, keyword-based, and visual explanation formats.
- Compared textual, keyword-based, and visual explanation formats to improve transparency and user trust.
- Built a high-fidelity Figma prototype and conducted a user-study-based evaluation to analyze trust, clarity, usefulness, and user perception of explanations.
- Applied Explainable AI principles, recommender-system concepts, and human-centered interface design.

DevOps and SecOps CI/CD Automation Project
Python, Docker, GitHub Actions, pytest, Google Cloud Run

Academic Project

- Containerised a Python REST API and configured automated CI/CD workflows with GitHub Actions, pytest, and code coverage checks.
- Deployed the application to Google Cloud Run using an automated image build and cloud deployment workflow.

Serverless Online Grocery Application
AWS, Terraform, Lambda, S3, DynamoDB, API Gateway, GitLab CI/CD

Academic Project

- Built a serverless web application architecture on AWS using Terraform for infrastructure provisioning and automated deployment.
- Implemented IAM, S3, DynamoDB, Lambda, and API Gateway, supported by a GitLab CI/CD pipeline.

Movie Recommendation System
Python, Pandas, NumPy, Scikit-learn, Google Colab

Academic Project

- Built a recommendation system using collaborative and content-based filtering concepts to generate personalized movie suggestions.
- Processed datasets and evaluated recommendation logic using data preprocessing and similarity-based matching.

EDUCATION

Hochschule Heilbronn
Master of Science in Software Engineering

Mar 2024 – 2026
Germany

Final grade: 1.7
All academic requirements completed; degree certificate pending.

Shree Swami Atmanand Saraswati Institute of Technology (SSASIT)
Bachelor of Engineering in Computer Engineering

Jun 2013 – May 2016
India

CGPA: 8.36 / 10

Government Polytechnic for Girls
Diploma in Computer Engineering

Jun 2010 – May 2013
India

CGPA: 8.64 / 10

LANGUAGES

English - Fluent C1 | German - B1, currently improving | Gujarati - Native | Hindi - Native

CERTIFICATIONS

AWS IoT | DevOps on AWS | Fundamentals of Machine Learning and AI | Intermediate Machine Learning
